

Observation of World Environment Day, 2020

Netaji Subhas Open University (NSOU) recognizes that to achieve excellence in teaching and research it is imperative to promote a culture of environmental responsibility by protecting the local environment through managing its activities, buildings and campuses. As an integral part of this responsibility, NSOU observes the World Environment Day, each year – at its Regional Centre (R.C.) Campuses – located at Kalyani (in Nadia Dist.), Durgapur (in Burdwan –West Dist.) and Jalpaiguri (in Jalpaiguri Dist.).

This year it was observed on 5th June, 2020. Due to the present pandemic situation followed by the landfall and devastation of the super cyclone – Amphan (during 20-21 May, 2020), the World Environment Day could not be observed much ceremoniously; it was rather restricted to mending of the gardens / medicinal gardens, planting of saplings and cleaning of greeneries in the campuses.

Some photographs of our activities (on 5/6/2020) at the said three Regional Centre (R.C.) Campuses are as annexed below.

Kalyani R.C.
