Question Bank for PG Course

Master of Library & Information Science

Paper-VII (New/Old) Research Methodology: MLIS-VII (NEW/OLD)

- 1. Categorize data on the basis of scales of measurement.
- 2. Define 'Research'.
- 3. Describe different types of qualitative research methods.
- 4. Differentiate between categorical and numerical data.
- 5. Differentiate between dependent and independent variables.
- 6. Differentiate between descriptive, inferential and explanatory study.
- 7. Differentiate between fundamental and applied research.
- 8. Differentiate between probability and non-probability sampling.
- 9. Differentiate between quantitative and qualitative research method.
- 10. Differentiate between quantitative and qualitative variables.
- 11. Discuss 'Research Design'.
- 12. Discuss diagrammatic presentation of frequency distribution.
- 13. Discuss ethical and social aspects of research
- 14. Name different types of data analysis software.
- 15. Show your acquaintance with APA reference style.
- 16. State the necessity of diagrammatic presentation of data.
- 17. What are the purposes of measures of dispersion?
- 18. What is 'Questionnaire'?
- 19. What is hypothesis?- discus with example.
- 20. What is normal distribution?
- 21. What is population parameter?
- 22. What is random sampling?
- 23. What is a variable?
- 24. Describe how you can manage your research activity with the help of Zotero?
- 25. What types of data do you need to conduct a research study?
- 26. Why literature review is necessary in research?
- 27. Write a short note of descriptive statistics.
- 28. Write a short note on Inferential statistics.
- 29. Write different types of graph with which you can present your data.
- 30. Write the steps of a research work.
