Research Policy

The Research Policy has been enunciated to guide the future of research in the University. A principal objective of NSOU's research project has been to maintain a strong focus on the flow of theoretical ideas and to connect it with the empirical works of subject oriented researches in social sciences, humanities, commerce & management, sciences and other disciplines offered by the University as areas of probe and investigation from time to time.

A research project is an opportunity to learn more about a particular subject. Through this process one can enhance and demonstrate a wide range of skills that are applicable to our real life. As a researcher, it is important to use a wide variety of sources and to evaluate the quality and validity of those sources. The purpose of research is to add knowledge. Thus, the study should seek to contextualize its findings within the larger body of research. Research project should add knowledge that is applicable outside the organization and society as whole. Above all, the results of the study should have implications for policy and project implementation.

Taking into considerations the importance, the University encourages its faculty members to carry out research projects in different subjects and provides financial assistance subject to availability of fund from government/ research institutions viz. MHRD,UGC-DEB, ICSSR, CSIR, DST,RCI, CIIL, IIAS, CSSS, CSGS etc. for their projects. The ambit of project work in the University has been expanded to include both theoretical and empirical research in various academic disciplines (core subjects). Interdisciplinary areas with blending approach of ODL methodology may also be accepted.
